

An h1 header

Paragraphs are separated by a blank line.

2nd paragraph. *Italic*, **bold**, and monospace. Itemized lists look like:

- this one
- that one
- the other one

Note that --- not considering the asterisk --- the actual text content starts at 4-columns in.

Block quotes are
written like so.

They can span multiple paragraphs,
if you like.

Use 3 dashes for an em-dash. Use 2 dashes for ranges (ex., "it's all in chapters 12--14"). Three dots ... will be converted to an ellipsis. Unicode is supported.

An h2 header

Here's a numbered list:

1. first item
2. second item
3. third item

Note again how the actual text starts at 4 columns in (4 characters from the left side). Here's a code sample:

```
# Let me re-iterate ...  
for i in 1 .. 10 { do-something(i) }
```

As you probably guessed, indented 4 spaces. By the way, instead of indenting the block, you can use delimited blocks, if you like:

```
define foobar() {  
  print "Welcome to flavor country!";  
}
```

(which makes copying & pasting easier). You can optionally mark the delimited block for Pandoc to syntax highlight it:

```
import time
# Quick, count to ten!
for i in range(10):
    # (but not *too* quick)
    time.sleep(0.5)
    print i
```

An h3 header

Now a nested list:

1. First, get these ingredients:
 - carrots
 - celery
 - lentils
2. Boil some water.
3. Dump everything in the pot and follow this algorithm:

```
find wooden spoon
uncover pot
stir
cover pot
balance wooden spoon precariously on pot handle
wait 10 minutes
goto first step (or shut off burner when done)
```

Do not bump wooden spoon or it will fall.

Notice again how text always lines up on 4-space indents (including that last line which continues item 3 above).

Here's a link to [a website \(http://foo.bar\)](http://foo.bar), to a [local doc \(local-doc.html\)](#), and to a [section heading in the current doc](#). Here's a footnote [\[1\]](#).

Tables can look like this:

size	material	color
9	leather	brown
10	hemp canvas	natural
11	glass	transparent

Table: Shoes, their sizes, and what they're made of

(The above is the caption for the table.) Pandoc also supports multi-line tables:

keyword	text
---------	------

red Sunsets, apples, and
other red or reddish
things.

green Leaves, grass, frogs
and other things it's
not easy being.

A horizontal rule follows.

Here's a definition list:

apples
: Good for making applesauce.
oranges
: Citrus!
tomatoes
: There's no "e" in tomatoe.

Again, text is indented 4 spaces. (Put a blank line between each
term/definition pair to spread things out more.)

Here's a "line block":

| Line one
| Line too
| Line tree

and images can be specified like so:

Inline math equations go in like so: $\omega = d\phi / dt$. Display
math should get its own line and be put in in double-dollarsigns:

$$I = \int \rho R^2 dV$$

And note that you can backslash-escape any punctuation characters
which you wish to be displayed literally, ex.: ``foo`, *bar*`, etc.

1. Footnote text goes here. ↩
